Alizem receives Altera Consultant Alliance Program accreditation

Quebec City (CANADA), December 1st 2008. Alizem leadership in FPGA Motor Control IP Core market has been recently recognized by Altera, a worldwide leader in FPGA technology based in San Jose, California, in receiving the Altera Consultant Alliance Program (ACAP) accreditation. Alizem is the second Canadian company to meet ACAP requirements and has demonstrated a high level of expertise with Altera programmable logic devices and a capability to provide high-value added products and design services for FPGA-based motor control applications.

Alizem's technology and expertise in motor control has led Altera to propose Alizem a first joint efforts in marketing Alizem Motor Control IP Cores worldwide into the Consumer electronics market. Alizem solutions have been chosen among competitors' as those providing the best performance in energy savings while achieving the smallest footprint on Altera Cyclone® III devices. "Altera low-cost programmable logic devices and electronic design automation tools enable Alizem to propose to system designers innovative solutions that increase energy-saving performances and reduce development costs and time to market." reports Marc Perron, president at Alizem inc. .

Alizem and Altera are jointly presenting their solutions at the next Consumer Electronics Show that is going to be held from January 8-11th 2009 at Las Vegas, Nevada.

About Altera

Altera is a worldwide leader in programmable logic solutions that enable system and semiconductor companies to rapidly and cost-effectively innovate, differentiate and win in their markets. Find out more at www.altera.com.

About Alizem

Alizem is a leading third-party Motor Control IP Core Company specialized in increasing energy savings, performance and reliability of power electronics applications. Find out more at www.alizem.com.
